thermoscientific

PRODUCT SPECIFICATION

OXOID MALT EXTRACT AGAR PO0182A

Typical Formula*

	grams per litre
Malt extract	30.0
Mycological peptone	5.0
Agar	15.0

*adjusted as required to meet performance standards

Preparation
Suspend Malt Extract Agar (50.0 grams / litre) in de-ionised water. Heat to dissolve. Sterilise at 115°C for 10 minutes. Aseptically dispense into petri dishes. Label dishes, wrap and label pack.

Format
Ten 90mm plates, wrapped in a single nylon film wrap. Each plate is ink-jet printed with (abbreviated) product name, product code, lot number and expiry date.

Labels
Label gives details of product name, product code, recommended storage temperature, lot number and expiry date.

Physical Characteristics

pH	5.4 ± 0.2
Colour	Straw 5 - Amber 1
Clarity	Clear
Fill weight	19.0 ± 2.0g

Packaging and presentation
General appearance of packaging and label should be satisfactory. Label data should be correct.

Contamination Check
Macroscopic examination should show no evidence of microbial growth after incubation at 20-24°C and 30-34°C for 5 days.

Microbiological Tests Using Optimum Inoculum Dilution

Results after incubation at 23-27°C for 5 days.

Positive controls
Inoculum 10-100 colony forming units

Candida albicans	ATCC® 10231	Cream colonies
Aspergillus brasiliensis	ATCC® 16404	White mycelia, black spores

Colony counts shall be equal to or greater than 50% of the control medium (Sabouraud dextrose agar).

Storage conditions
Store away from the light between 2-10°C .
